

TY ART

PRODUCT CATELOGUE

NATURE

For over a decade, Ty Art has been dedicated to exploring metal materials and handicraft production. With the improvement of material standards and the enhancement of spiritual culture, traditional production methods have failed to meet the requirements of high-quality modern art spaces. Therefore, Ty Art has formed a new team and conducted in-depth exchanges and cooperation with numerous designers and artists. From the feasibility study of the process to the complete solution of the design and production chain, they have improved the plan to achieve the artistic expression of metal materials in modern life.

Ty Art adheres to the dedication and control of artworks for every design. The extreme craftsmanship and artistic pursuit can better reflect and exert the distinct demands of artists and designers, generating more possibilities through collision.
